This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations:

As recommendations for **Botium Toys**, several controls are proposed to improve asset security and reduce potential risks. These are listed below for implementation within the organization:

- **Least privilege control** to reduce the risk and impact of compromised accounts
- **Encryption control** to ensure the confidentiality of sensitive information

- **Separation of duties**, which reduces the risk of malicious users and compromised accounts
- **Implementing an IDS** to detect and prevent anomalous traffic
- **Disaster recovery plans and backups**, which allow for business continuity and enable restoration and recovery after an event
- **Password policies and management**, which would help the organization reduce the risk of brute-force or dictionary attacks on accounts and minimize password fatigue to avoid productivity loss
- **Regular manual monitoring following established schedules for legacy systems**, which will allow the identification and management of threats, risks, or vulnerabilities in outdated systems.
